

## EXPECTED OUTPUTS

The BHEAP envisages the following outputs:

- An assessment of the extent to which health and environment issues are incorporated in national planning for sustainable development,
- Identification of national priority areas for health and environment activities,

- A recommended plan of action for ensuring that health and environment issues are incorporated in the national plans for sustainable development, with particular emphasis on sectoral responsibilities and capacity building requirements, and
  
- Monitoring of activities that impinge on health and environment.
