National or Independent Observers are expected to conduct as many RCAs as possible (at least one) daily. Conduct assessment only in areas where campaign session has already taken place. Try to identify missed communities, especially in isolated areas, at the farthest point from the vaccination site, socially segregated groups, street children, working children in small enterprises or markets, etc. Start in a central location, and pick a direction at random to start by tossing a coin. Begin with the first house facing you. Identify and tally 20 target-age children in 20 households. If a household has more than one eligible child, include only one randomly selected child from each household. To do this, list the eligible children on the back of the form, assign each a number (1, 2, 3, etc.), and use the first number of the serial number on a money bill to select and record only one child. If any children were unvaccinated, send them to the nearest vaccination site that is open on that day or to the fixed site.

Mark the following questions and tick accordingly in the appropriate column

I. Did the child receive measles vaccine during the campaign? If Yes Tick under RECEIVED column If No Tick under MISSED column and write name & address on the opposite side

II. Did the child have any AEFI after vaccination? If Yes Put serial number of AEFI in the boxes of REPORTED AEFI column

Signature:

National and Independent Observers will submit all RCA forms along with filled in checklists daily to local State/Division officer in charge. Copy to be submitted to WHO (Yangon & RSO).

**FORM TO BE COMPLETED BY TMO/REGION/ STATE LEVEL OBSERVERS/CENTRAL OBSERVERS/ INDEPENDENT OBSERVERS**

**RCA notes**

RCA must be done after completion of vaccination in the village or ward, ideally within 2 or 3 days of completion.

If few missing children from their area inform TMO.

If more than 5 children are found missed, the entire area must be covered by mopping up
